DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the phrase "The subject invention is an improved" is redundant, and should be --A--.. Correction is required.
See MPEP § 608.01(b).

Claim Objections

2. Claim 3, ln. 7 are objected to because of the following informalities: , the phrase "to be support up against", should be --to be supported up against--,. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin # 5,896,609

Lin discloses a supplemental support system for a bridge having a deck (30) for vehicular traffic said deck having upper and lower surfaces (30',30). Said bridge having primary support members (10) for supporting the bridge deck.

Said support system comprising:

A longitudinally extending under-support member (24) having an upper surface and a lower surface, wherein the upper surface of the under-support member is adapted to embrace a portion of the lower surface (30) of the bridge deck.

A suspension support system (40, 41) for supplementary support of said bridge. Said suspension support system having one or more support cables (40), and connecting means (41) attached to portions of said under-support member for the intended use of holding said under-support member up against the under surface of the bridge deck (30). See Figs. 2-5, cols. 3-6.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Hinman #

6,728,987 B1.

Hinman discloses a supplemental support system for a bridge (2) having a deck (6) for vehicular traffic said deck having upper and lower surfaces. Said bridge having primary support members (10) for supporting the bridge deck.

Said support system comprising:

A longitudinally extending under-support member (20, 22) having an upper surface and a lower surface, wherein the upper surface of the under-support member (20) is adapted to embrace a portion of the lower surface of the bridge deck 6.

A suspension support system (12, 17) for supplementary support of said bridge.

Said suspension support system having one or more support cables (12), and connecting means (17, 18) attached to portions of said under-support member for the intended use of holding said under-support member up against the under surface of the bridge deck (6).

See Figs. 3-4; cols. 3-4.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Greer # 513,389 discloses a suspension bridge. Stedman et al. # 441,598 discloses a suspension bridge. Tomlinson # 755,724 discloses a bridge. Sturgis # 629,935 discloses a suspension bridge. Lovett et al. # 5,173,982 discloses a suspension cable arrangement, see fig. 3. Finsterwalder # 4,473,915 discloses a tension member and assembly.
